Planning Ref 2016/0330/DET

With reference to the above application I am concerned that previous applications to build on this site were turned down because of lack of vehicular access to the site, and also because it was contrary to the embargo on lochside building developments.

Now an application is being made for such access, which if granted would no doubt be followed by an application to build.

Any such building would greatly reduce the attraction of my property which was originally positioned to provide loch views many years ago, and has been blighted by earlier developments (which I am told were built higher than approved by planning) removing any loch views.

Yours
