The viewpoint meanders between the crags with natural hollows in the landscape with stunning views across Loch Lubnaig to Ben Ledi. It is located on the A816 Callander to Strathyre Road.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.

The Sloy Dam is the Dochart hydro-electric power station. It is located on the River Dochart near the southern tip of Loch Katrine. The dam is a hydro-electric power station that generates electricity. It is a civil engineering structure used to control flood waters and generate hydro-electric power.
it’s not just the destination...
...it’s the journey too

Woven Sound
Falls of Falloch

LookOut
Loch Voil

An Ceann Mòr
Inveruglas

Sloc nan Sìtheanach
(Faerie Hollow)

Loch Lubnaig beag
