No	Year	Audit	Recommendations	Priority	National Park Authority Response	Responsibility/ Timescale	Current Status - August 2017
1	2014/15	Fixed Asset Register	Management should update the current fixed asset policy to ensure it reflects current practices at the authority ensuring that the policy is robust and allows for efficient asset management, appropriate update of the fixed asset register and accurate reflection of the Net Book Value of all assets in use by the Authority for accounting purposes.	Low	Policy will be updated	Financial Performance Manager December 2017	Forms part of Asset Management project - expected to complete by December but not progressed as much as would have hoped by this point as a result of other priority workload
2	2014/15	Fixed Asset Register	Management should ensure that the asset register is updated to reflect the recognition and initial measurement at net book value to allow the reconciliation of the revaluation reserve to revaluations and impairments and ensure that previous revaluations have been appropriately reported within the fixed asset register. The use of the fixed asset software could be reintroduced to record the fixed asset register to improve the quality and robustness of the information and provide a better audit trail.	Low	Fixed Asset opening balances will be adjusted to reflect transfer at nil plus subsequent upward revaluation. We will assess whether the use of the fixed asset software would be more beneficial than the Excel spreadsheet.	Financial Performance Manager December 2017	As above
3	2015/16	CRSA (Fixed Assets)	In the fixed asset listing, the IT hardware section is a single line and does not split out the components. This leads to two risks: policy may not be appropriate as assets are depreciated after they have been disposed of; and there may be assets which have been fully depreciated which are still in use. As part of the planned review of the Fixed Asset Policy management should consider: The useful lives of assets to ensure they are depreciated over an appropriate period; Appropriate componentisation of assets to allow them to be recognised and derecognised appropriately; and Verification of individual/groups of assets.	Low	Agreed.	Financial Performance Manager December 2017	As above
4	2016/17	Controls Risk Self Assessment	As part of the on-going review of the fixed asset policies, management should consider updating the fixed asset register at the point of addition or disposal and to improving the disposal recording process to take account of straightforward disposals.	Low	Agreed. This will be incorporated into the refresh of the Fixed Asset policy.	Financial Performance Manager December 2017	As above
