How to secure your tent with chains & hooks

Set up the tent on the platform.

There are a number of ways to use the chains and hooks. This will depend on your tent's size and shape. Here are 3 options:
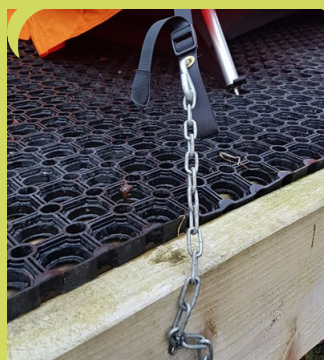

A

Insert the chain hook through the tent strap loop.

Hook the chain tightly to the platform eyelet.

B

Thread multiple tent loops by connecting two chains & anchoring them to the platform eyelet.

C

Use two chains to fix a corner point.

Anchor the tent guy lines to the platform eyelet to secure the tent.

Your tent is ready!
