

Camping in Loch Lomond & The Trossachs National Park

Camping Management Zones

You are in a Camping Management Zone which are in place between March and September.

These management zones are to help protect environmentally sensitive areas of the National Park.

The zones are marked by these signs. To camp in one of these zones between March and September you need to book into a campsite or a designated permit area.

You are **not** in a permit area so cannot camp here.

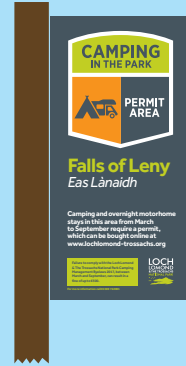

To camp in a Camping Management zone you will need to move into a permit area and buy a permit.

If you do not wish to buy a permit you will need to move to an area outside of the Camping Management Zone where you can wild camp without a permit.

Please be aware that camping without a permit in a Camping Management Zone, irresponsible firelighting, leaving litter or damaging trees could result in you being charged under local byelaws and may lead to a fine.

Permits

Permit areas don't have set pitches or facilities. They are marked by these signs.

Permits provide an exemption from local byelaws and allow you to camp in the permit areas.

£3

Permits cost £3 per tent per night.

You can camp in a permit area for a maximum of 3 nights.

The size of your party must not exceed a maximum of four adults (16 years old and over) and as many children as may be reasonably accommodated.

If you are fishing please make sure you have the landowners permission and where needed an appropriate fishing permit. **Camping permits do not include fishing.**

You can buy your permit online at:

www.lochlomond-trossachs.org/camping

or by calling 01389 722001

Byelaws

If you are having a fire, bring your own fire wood as cutting trees or collecting dead wood damages the environment, wildlife and could result in a fine.

Use a fire pit or similar to prevent damage to the ground.

Keep fires small and under control and away from trees.

Please leave the permit area as you found it and take any litter away with you to the nearest bin.
