

Job Description:

Job	Mission Zero Technical Lead
Hours per week	35 (flexible)
Service	Corporate Services – People & Assets
Team	Estates
Job location	Hybrid (circa 2 days p/w in office)
Line Manager	Strategic Estates Asset Manager
Band	D

Key purpose

As a public body committed to tackling the twin climate and nature crises the National Park Authority is aiming to be a net zero organisation by 2030 and to support the National Park to be a net zero place in time. Over the next decade we will transform how we operate – putting emissions reduction and climate adaptation at the heart of our decision-making and actions.

The Net Zero Technical Lead is responsible for driving on the ground delivery of our decarbonization and climate adaptation measures across the organization, with a key focus on our Estate. This technical role is suitable for candidates with experience in related programme management or electrical engineering, including renewable energy delivery and low-carbon infrastructure projects.

Key accountabilities

- Lead delivery of the organisation's [Mission Zero Route Map](#), a multi-year programme of decarbonisation across the National Park Authority's estate and fleet.
- Plan and implement agreed climate adaptation measures across estate assets, including offices, visitor centres, ranger bases, piers, slipways, car parks and public greenspaces.
- Develop and maintain a robust monitoring and reporting framework for Mission Zero, supporting statutory climate reporting requirements and producing regular performance reports.
- Identify and manage resources, budgets and personnel, including internal teams, consultants, and contractors, to deliver decarbonisation and adaptation projects, using approved procurement processes.
- Undertake any other duties appropriate to the grade as required.

Person specification

Assessment Areas	Essential Criteria	Desirable Criteria
